# Daniel Morán Vílchez

FULL STACK DEVELOPER & DATA ENGINEER

Piura, Peru · UTC−5 · available remotely
skaan.dmv@gmail.com · danielmoranv.github.io · github.com/DanielMoranV · linkedin.com/in/danielmoranv

## Profile

I build the business software companies run on every day, and I specialise in the uncomfortable part: **modernising systems that cannot be switched off**. Seven products in production, three of them mine and sold by subscription, four built for clients who paid for them. Before programming full time I spent six years in technical support and infrastructure, which is why I know how production systems break: I kept them running before I started building them.

## Experience

### Backend developer & systems analyst (full stack)

November 2022 – present

CLÍNICA SANTA ROSA — SULLANA, PIURA, PERU

**Data platform and migration**

A DBF engine of my own in Python that reads and **writes** FoxPro tables at byte level with byte-range locking, so the 1990s application stays open on every desk and never notices. Exposed as a FastAPI service: migrations by date range as asynchronous jobs you can follow, a scheduler that starts and stops while the system is up, and analytics endpoints. **Over 500,000 historical records into PostgreSQL with zero days of downtime**, and around 2,000 a day through the automated pipeline.

**Clinical intranet**

A central Laravel 12 API orchestrating admissions, records, human resources and IT support, with real-time events over WebSockets so admission screens stay in sync. It stamps data and signatures onto existing PDF templates. Vue 3 single-page client with a shift calendar, barcode reading from the browser camera, and PDF and Excel export done on the client.

**Medical insurance management**

The full insurance cycle — admission, clinical record, billing, medical audit and settlement — with role-based access separating auditors, billers and administration. Live notifications over WebSockets and bulk Excel import and export. Laravel 11, Vue 3, deployed with Docker.

**AI chatbot for the call centre *(in development)***

A conversational assistant to take repeated calls off the clinic's phone lines. Python on the server, a Vue client, packaged in Docker.

**Infrastructure and continuity**

PostgreSQL and MySQL administration, automated backups and Linux servers. Secure remote access to internal systems through Docker Compose and Cloudflare Tunnels, without exposing ports.

BEFORE 2022 · TECHNICAL SUPPORT AND INFRASTRUCTURE

DANITEC, desktop support technician (2020–2023) · CONERI E.I.R.L., logistics deputy manager (2017–2020) · ECOEVEC S.A.C., IT specialist (2017) · Chalaco District Council, technical support (2016). LAN/WLAN/WAN networks, hardware maintenance and user training.

## Products in production

All with a live URL and their start year. The first three are my own subscription products; the next four were commissioned and paid for.

| | | | |
|---|---|---|---|
| **AlmaZen**<br>2025 · OWN | ERP: inventory, purchasing, sales, POS, SUNAT e-invoicing, AI agent | Laravel · Livewire · PostgreSQL · Gemini | almazenapp.djasoft.net.pe |

| | | | |
|---|---|---|---|
| **Mozaico**<br>2026 · OWN | Restaurant management, floor and kitchen synced over WebSockets | Go · Gin · sqlx · React 19 · PostgreSQL | mozaicopro.djasoft.net.pe |
| **EasyPay**<br>2026 · OWN | Staff, attendance, scheduling and payroll runs | TypeScript · NestJS | easypay.djasoft.net.pe |
| **Master Color**<br>2025 · CLIENT | E-commerce, order management and a field-support app | Laravel · Vue 3 · Flutter · AWS S3 | mastercolor.net.pe |
| **Otto Tonsmann**<br>2026 · CLIENT | Cash desk, receipts and student registry with RBAC and audit trail | Vue 3 · Firebase | otto-tonsmann.web.app |
| **CONERI**<br>2024 · CLIENT | Catalog with a quote cart and an admin panel | Firebase · Cloud Functions · Cloudflare Pages | coneri.pe |
| **SURGIMED**<br>2024 · CLIENT | Corporate site with continuous deployment from the repository | Firebase Hosting · GitHub Actions | surgimed-pe.web.app |

## Case studies

Written with the decision and the discarded alternative, not just the outcome:

- **Writing to FoxPro tables that are still open** danielmoranv.github.io/case-studies/foxpro-dbf
- **An agent inside the ERP, without handing it the keys** danielmoranv.github.io/case-studies/ia-en-producto
- **A restaurant backend without an ORM** danielmoranv.github.io/case-studies/tiempo-real-sin-orm

## Open source

**angel-cli** PYTHON · MIT
Structured state management for AI workflows. Tasks in Markdown+YAML, validation via Git SHA diff, native MCP server with 7 tools.

**py-foxpro-engine** PYTHON · MIT
Reads and writes FoxPro (.dbf) tables at byte level with byte-range locking. No dependencies.

**nomenclador** PYTHON · MIT
Bulk-renames PDF invoices, with OCR fallback and each insurer's naming scheme.

**agente-csr** PYTHON · MIT
AI analytics agent for hospital management. Enforced read-only on PostgreSQL and DBF, isolated workspace, Excel/Word/PDF reports. Peruvian health-data law compliant.

**sunat-comprobantes** PACKAGIST · MIT
Peruvian electronic invoicing (SUNAT) utilities, published as djasoft/sunat-comprobantes.

## Stack

| | |
|---|---|
| BACKEND | Go · Gin · sqlx · PHP · Laravel · Livewire · TypeScript · NestJS · Python · FastAPI |
| FRONTEND | Vue 3 · PrimeVue · Pinia · React 19 · Livewire · Astro · TailwindCSS |
| DATA | PostgreSQL · PL/pgSQL · MySQL · Redis · Firestore · SQLAlchemy · Eloquent · FoxPro · DBF · ETL |
| MOBILE | Flutter · Dart · SQLite (Drift) · C# (desktop) |
| INFRASTRUCTURE | Docker · Linux · Nginx · GitHub Actions · Cloudflare (Pages, Tunnels) · Firebase · AWS (EC2, S3) |
| AI | Function calling · per-tool RBAC · Gemini · Ollama · OpenRouter |

## Education

| | | |
|---|---|---|
| **Universidad César Vallejo** | BSc Systems Engineering | in progress |
| **Silabuz** | Backend development bootcamp | 2022 – 2023 |
| **I.E.S.T.P. Juan José Farfán Céspedes** | Higher Technician in Computing and IT — qualified | 2013 – 2015 |

## Certifications and languages

Laravel · Vue.js · Node.js — verified by Talently

Spanish (native) · English (professional working)
